

St Pauls CE Primary School

Mobile Technologies Policy

Pending Approval by the Full Governing Board - Autumn 2025
Review Date - Autumn 2026

Mobile technology devices may be a school owned smartphone, tablet, notebook/laptop or other technology that usually has the capability of utilising the school's wireless network. The device then has access to the wider internet which may include the school's learning platform and other cloud based services such as email and data storage.

The absolute key to considering the use of mobile technologies is that the learners, staff and wider school community understand that the primary purpose of having their personal device at school is educational and that this is irrespective of whether the device is school owned/provided or personally owned. The mobile technologies policy sits alongside a range of policies including but not limited to the safeguarding policy, anti-bullying policy, acceptable use policy, policies around theft or malicious damage and the behaviour policy. Teaching about the safe and appropriate use of mobile technologies is included in the online safety education programme.

- The school acceptable use agreements for staff, learners and parents/carers will give consideration to the use of mobile technologies
- The school allows:

	<i>School/devices</i>		<i>Personal devices</i>			
	School owned and allocated to a single user	School owned for use by multiple users	Authorised device ¹	Learner owned	Staff owned	Visitor owned
Allowed in school	Yes	Yes	Yes	No	No	Yes
Full network access	Yes	Yes	Yes	No	No	Restricted
Internet only						
No network access						

The school has provided technical solutions for the safe use of mobile technologies in school (delete/amend as appropriate):

- All school devices are managed through the use of Mobile Device Management software (Jamf)
- Appropriate access control is applied to all mobile devices according to the requirements of the user (e.g Internet only access, network access allowed, shared folder network access)

¹ Authorised device – purchased by the learner/family through a school-organised scheme. This device may be given full access to the network as if it were owned by the school

- The school has addressed broadband performance and capacity to ensure that core educational and administrative activities are not negatively affected by the increase in the number of connected devices
- For all mobile technologies on the school network, filtering will be applied to the internet connection and attempts to bypass this are not permitted
- Appropriate exit processes are implemented for devices no longer used at a school location or by an authorised user.
- All mobile devices on the school network are monitored
- The software/apps originally installed by the school must remain on the school owned device in usable condition and be easily accessible at all times. From time to time the school may add software applications for use in a particular lesson.
-
- The school will ensure that devices contain the necessary apps for school work. Apps added by the school will remain the property of the school and will not be accessible to learners on authorised devices once they leave the school roll.
- Where a school device has been provided to support learning. It is expected that learners will bring devices to the school as required.
- The changing of settings that would stop the device working as it was originally set up and intended to work is not permitted

When personal devices are permitted:

- *Personal devices are brought into the school entirely at the risk of the owner and the decision to bring the device in to the school lies with the user (and their parents/carers) as does the liability for any loss or damage resulting from the use of the device in school*
- *The school accepts no responsibility or liability in respect of lost, stolen or damaged devices while at school or on activities organised or undertaken by the school (the school recommends insurance is purchased to cover that device whilst out of the home)*
- *The school accepts no responsibility for any malfunction of a device due to changes made to the device while on the school network or whilst resolving any connectivity issues*
- *The school recommends that the devices are made easily identifiable and have a protective case to help secure them as the devices are moved around the school. Pass-codes or PINs should be set on personal devices to aid security*

- *The school is not responsible for the day to day maintenance or upkeep of the users personal device such as the charging of any device, the installation of software updates or the resolution of hardware issues*

Users are expected to act responsibly, safely and respectfully in line with current acceptable use agreements, in addition:

- There is clear advice and guidance at the point of entry for visitors to acknowledge school requirements
- Users are responsible for keeping their device up to date through software, security and app updates.
- Users are responsible for charging their own devices and for protecting and looking after their devices while in the school
- Confiscation and searching (England) - the school has the right to take, examine and search any device that is suspected of unauthorised use, either technical or inappropriate.
- Users should be mindful of the age limits for app purchases and use and should ensure they read the terms and conditions before use.
- The expectations for taking/storing/using images/video aligns with the school's acceptable use policy and use of images/video policy. The non-consensual taking/using of images of others is not permitted.
- *Devices may not be used in lessons.*
- *Staff owned devices should not be used for personal purposes during teaching sessions, unless in exceptional circumstances.*
- *Printing from personal devices will not be possible*

Insurance

Schools that have implemented an authorised device approach (1:1 deployment) may wish to consider how they will insure these devices and should include details of the claims process in this policy.
